Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-16, 19-58 and 60-62 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanaka et al (6,730,144 B2).

The applied reference has a common inventor named Mikiko Gokano with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Tanaka et al teach an air purifying filter media in association with water resistance and water repellency and exhibiting bactericidal/sterilizing or antimicrobial means properties using enzyme reaction (col. 7, lines 1-5). Tanaka et al further teach the filter media fiber having the functional group consisting of inorganic fiber, nature fiber and inorganic fiber from boron-silica glass fibers (see col. 6, lines 54-67), and the enzyme used as described in col. 8, line 22 through col. 9, line 58). See also the whole document for other limitations claimed in the dependent claims are met by this reference Tanaka et al.
